

Harry Potter™

WIZARDING
WORLD

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

Wir stellen von Einwegkunststoff-Verpackungen auf Verpackungen auf Papierbasis um. Möglicherweise findest du in der Übergangszeit sowohl Papier als auch Kunststoff in unseren Boxen.

Nous passons progressivement des emballages en plastique à usage unique aux emballages à base de papier. Au cours de cette transition, il est possible que vous trouviez à la fois du papier et du plastique dans nos boîtes.

Stiamo passando dalla plastica monouso agli imballaggi basati su carta. In questo periodo, potrete trovare un mix di carta e di plastica nelle nostre confezioni.

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puede que encuentres una mezcla de papel y de plástico en nuestras cajas.

Estamos a fazer a transição do uso de plástico descartável nas embalagens por embalagens à base de papel. À medida que progredimos nesta transição poderá encontrar um misto de papel e plástico nas nossas caixas

Átállunk az egyszer használatos műanyagról a papír alapú csomagolásra. Az átállás folyamatos, ezért előfordulhat, hogy papír és műanyag zacskót egyaránt találás a dobozainkban.

Mēs pārejam no vienreizlietojamās plastmasas uz iepakojumu, kurā izmantots papīrs. Pārejas procesa laikā kārbās var būt gan papīra, gan plastmasas daļas.

Facem tranziția de la ambalajele de unică folosință din material plastic la ambalaje pe bază de hârtie. Pe măsură ce avansăm, s-ar putea să găsești un amestec de hârtie și material plastic în cutiile noastre.

我们正在从一次性塑料包装向纸质包装过渡。在此过程中，你可能会发现我们同时采用纸质包装和塑料包装！

« Ça dit “ voie numéro neuf
trois quarts ” mais il doit y
avoir une erreur. »

– Harry Potter

VOS BILLETS S'IL VOUS PLAÎT !

Lorsque nous étions des enfants moldus, nous allions généralement à l'école en vélo, à pied ou en bus. Peu d'entre nous n'auraient imaginé que se rendre à l'école pouvait être *aussi* magique. Mais il n'est jamais trop tard pour rêver ! Depuis le lancement de l'Édition Collector du plus grand château de Poudlard LEGO® jamais construit (2018), notre classe de sorcières et de sorciers LEGO a opéré sa magie créative pour faire apparaître de nouveaux sets exclusifs et enrichir l'univers des sorciers. Vous pouvez vous rendre dans les magasins et faire vos achats sur le Chemin de Traverse LEGO (2020), ou exposer votre lettre d'admission à Poudlard ainsi que vos souvenirs scolaires avec le set Icônes de Poudlard (2021). Et maintenant, vous détenez enfin un billet pour monter à bord du Poudlard Express LEGO le plus détaillé à ce jour.

En construisant ce train, vous pourrez recréer tous les détails familiers de quatre des scènes les plus emblématiques du Poudlard Express, du premier voyage en train de Harry Potter au départ de son fils depuis la voie 9¾, plusieurs années plus tard. Bienvenue à bord !

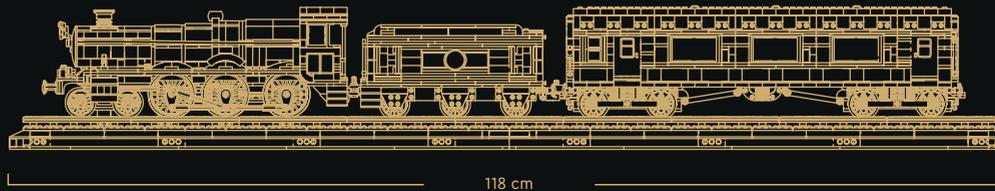

Marcos Bessa, LEGO® Design Master

UNE MACHINE MOLDUE ENCHANTÉE

La légende affirme qu'il aura fallu pas moins de 167 sortilèges d'amnésie ainsi que le plus puissant charme de camouflage de l'histoire pour mettre en service le Poudlard Express au début du 19^e siècle. Avant cela, les élèves se rendaient à Poudlard sur des balais, à bord de charrettes enchantées ou à dos de créatures magiques. De tels moyens de transport étaient problématiques si l'on devait transporter des bagages et des animaux domestiques tout en essayant de ne pas attirer l'attention des Moldus ! Des portoloins furent utilisés sur une courte période, mais ils provoquaient des malaises chez de nombreux élèves ou les faisaient arriver en retard le jour de la rentrée des classes. C'est ainsi que dans les années 1820, Ottaline Gambol, ministre de la Magie, eut l'idée de concevoir une machine moldue enchantée : un train. Dans les années 1850, la gare (moldue) de King's Cross est inaugurée à Londres, et le ministère de la Magie y ajoute la voie dissimulée 9¾.

Le Poudlard Express LEGO® est reproduit à
une échelle approximative de 1:32

Harry Potter à l'école des sorciers

LE DÉBUT DU VOYAGE

Harry, Ron et Hermione se rencontrent pour la première fois. Peu impressionnés par la célébrité dont jouit Harry au sein du monde des sorciers, Ron et Hermione le voient tel qu'il est et deviennent ses amis et alliés pour la vie.

Harry Potter et le prisonnier d'Azkaban

SORTILÈGES ET CHOCOLAT

Le professeur Remus Lupin sauve Harry lors de sa première rencontre cauchemardesque avec un Détraqueur grâce à un puissant sortilège de Patronus et du chocolat, et devient le mentor de Harry.

Harry Potter et le Prince de Sang-Mêlé

Harry Potter et les Reliques de la Mort – Partie 2

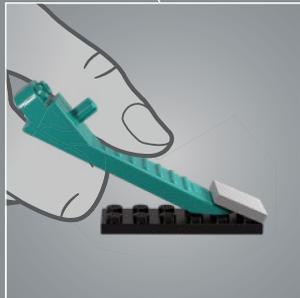

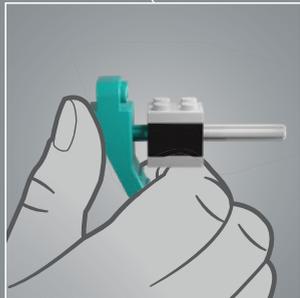

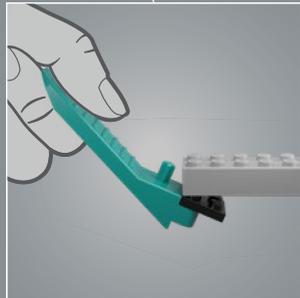

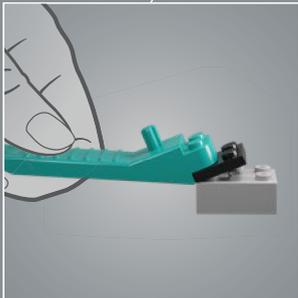

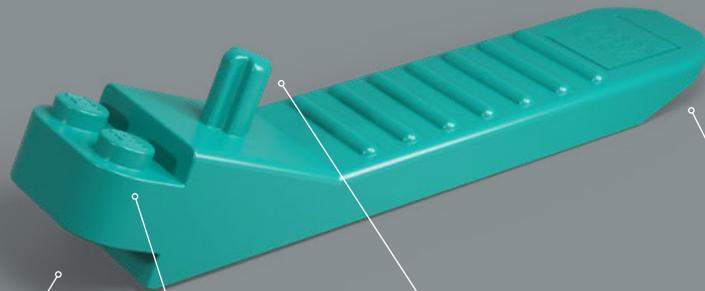

JONCHERUINES À LA RESCOUSSE

Drago Malefoy surprend Harry en train d'espionner et lui jette un sort *Petrificus Totalus* qui l'immobilise au sol sans défense, recouvert par sa cape d'invisibilité. Alertée par des nuées de Joncheruïnes, Luna Lovegood™ vient à la rescousse.

UN NOUVEAU DÉPART

19 ans après le combat final entre Harry et Voldemort™, le jeune fils de Harry, Albus Severus, est prêt à vivre à son tour des aventures ensorcelantes à l'école de sorcellerie Poudlard.

LE SECRET DE LA TRANSMISSION

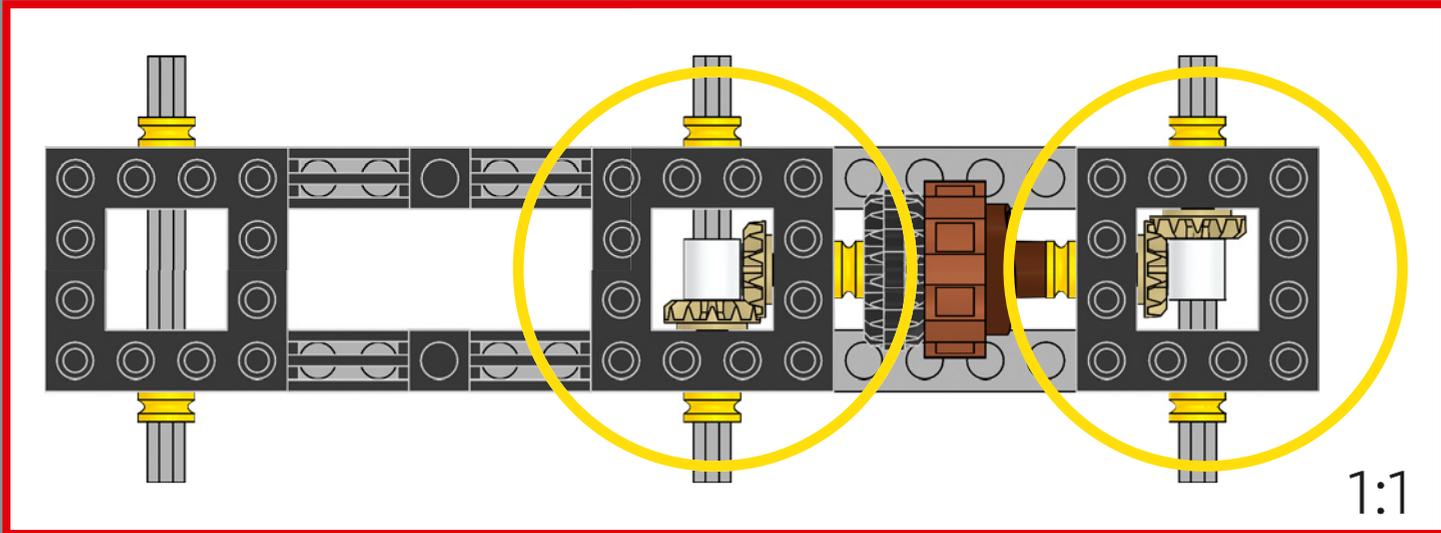

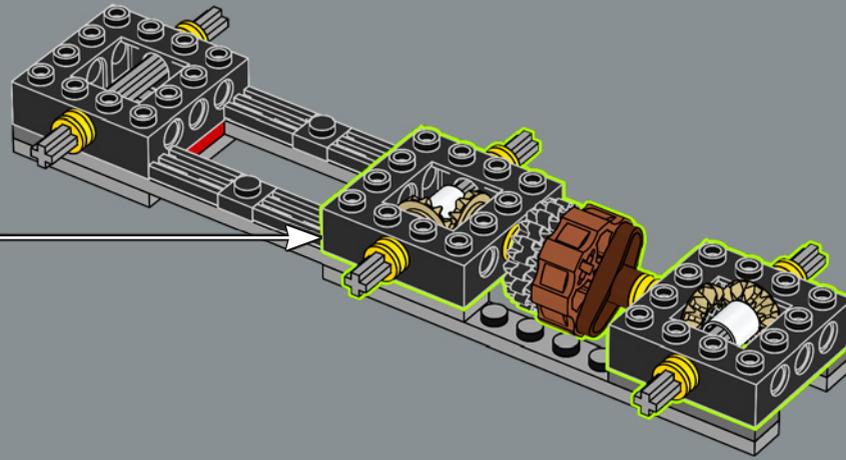

La transmission entre les roues de la locomotive ajoute non seulement des détails au wagon, mais elle vous aide également à maintenir les roues du milieu correctement alignées lorsque vous posez les bielles. Cette combinaison d'éléments vous permet de manipuler et d'ajuster chaque axe de roue indépendamment. Lorsque vous connectez les roues, la friction permet alors à la force appliquée aux engrenages de se transmettre aux roues. Cela réduit la tension globale et assure un fonctionnement beaucoup plus fluide.

UNE ILLUSION D'INGÉNIERIE

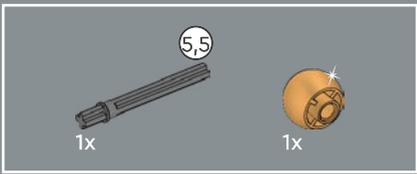

Inspiré par la locomotive à vapeur GWR 4900 Class 5972 Olton Hall utilisée pour le Poudlard Express dans les films, Marcos Bessa, designer de modèles LEGO®, a créé une locomotive aux lignes fluides qui donne l'impression d'être conique. Le diamètre de chaque module est progressivement réduit, mais par incréments si infimes que les différentes combinaisons de supports et de plaques spéciales font vraiment ressortir les subtilités du système de construction LEGO.
